

Micro-mini- research project (5%)

After being introduced to the library's resources (video on Moodle), you will complete a short research project where you find and briefly annotate (re: summarize) two texts related to a topic of their choosing. The topic should relate to class discussions or course readings.

To be submitted:

- Two annotated bibliography entries of peer-reviewed sources related to the research topic
- List of 5 books (at least 2 ebooks/fully online books) you discovered when looking through the database based on a search for *a* book on your research topic
- A 1 paragraph reflection on using library resources to learn more about your research topic

Assessment: P/F
